RE: Water Rate Study Committee

Dear Board Members,

My understanding is that the Board is looking for some help in establishing new water rates for which I would like to be considered.

Although anything but a water expert my past experiences serve to give me some understanding of water issues, such as

- the author of the Zoning Protection District before DEP made the specification requirements mandatory.
- representative for Lynnfield on the North Suburban Water Supply Protection Plan issued in 1992 by MAPC.
- from the many years on the Conservation Commission and Planning Board, an understanding of the political workings of many government and private committees thus allowing me to work in a helpful manner.

Please feel free to call if you have questions.

Thank you for consideration,

Alan

Christine Smallenberger
Office Manager
Lynnfield Center Water District
83 Phillips Road
Lynnfield, MA 01940

Dear Ms. Smallenberger,

I hereby submit my application for consideration in the formation of LCWD's Water Rate Advisory committee.

I have lived at [REDACTED] since 1984 and am current on [REDACTED] i/n/o my husband, George E. Richardson.

I believe that my resume (attached separately) and experiences will be helpful in examining the District's current water rates and establishing future ones. Upon moving into town, I was invited to join the Finance Committee where I served for 9 years. In particular, my experience as a Municipal Finance Officer at Bank of Boston enabled me to help the town improve some aspects of short-term borrowing. After 20+ years at Bank of Boston, I moved into a teaching career, mostly at the high school level. My experience as a Department Head will help me negotiate compromise and cooperation.

As my resume indicates, I have been an active volunteer in town, church, and other organizations. In retirement, I am enjoying contributing my mathematical, organizational, and managerial skills in order to improve a variety of communities.

I would look forward to being appointed a member of LCWD's Water Rate Advisory committee.

Sincerely,

Gayle G. Richardson
